

User Story: The Challenge

Overview

The Interview Challenge Platform extends the AI Interview application beyond interview practice by allowing qualified users to create and distribute structured interview challenges to candidates.

The feature serves two distinct use cases:

1. **Private Challenges** – used as a first-round screening tool during recruitment.
2. **Public Challenges** – used as open competitions where users can participate, compare scores, and improve their interview skills.

The same interview engine powers both experiences while providing different visibility, access, and scoring rules.

Business Objective

Transform the application from an interview preparation tool into a platform that supports both:

- AI-powered candidate screening for recruiters.
- Community-driven interview competitions for job seekers.

This creates additional engagement, recurring usage, and monetization opportunities through subscriptions and the in-app coin economy.

User Story

As a subscribed user with sufficient coins,

I want to create an AI interview challenge,

so that I can either evaluate candidates privately or host a public interview competition where participants can compare their performance.

Challenge Types

1. Private Challenge

Designed for recruitment and candidate screening.

The creator prepares an interview and distributes it only to selected candidates.

Typical Workflow

- Creator creates a challenge.
- Creator writes interview questions.
- Creator configures challenge settings.
- Creator receives:
 - Invitation link
 - Invitation code
- Creator selects the phone numbers that are allowed to participate.
- Candidates receive the invitation.
- Candidates complete the interview.
- AI evaluates every submission.
- Creator reviews all candidate results.

Access Rules

- Only invited phone numbers can join.
- Joining requires both:
 - Valid invitation
 - Authorized phone number
- Unauthorized users cannot access the challenge.

Results Visibility

Creator can view:

- Every candidate
- AI score
- Individual question performance
- AI feedback
- Rankings (optional)

Candidate can view:

- Their own interview experience.
- Their own AI evaluation only.

- No other participant information.
-

2. Public Challenge

Designed as an interview competition for the community.

Any eligible user can join after paying the required coin fee.

Typical Workflow

- Creator publishes a challenge.
- Challenge appears in the Public Challenges screen.
- Users spend coins to join.
- AI evaluates each submission.
- Rankings update automatically.

Results Visibility

Creator can view:

- Every participant
- All interview results
- Complete leaderboard
- AI analytics

Participants can view:

- Their own detailed AI feedback.
 - Their own interview analysis.
 - Public leaderboard.
 - Rankings.
 - Scores.
 - Competition statistics.
-

Challenge Creation Rules

A user may create a challenge only if:

- The user is logged in.
- The user's subscription plan allows challenge creation.
- The user owns enough coins to pay the creation cost.

If any requirement is not met, challenge creation is blocked and the user is prompted to upgrade their plan or acquire additional coins.

Challenge Configuration

When creating a challenge, the creator configures:

Basic Information

- Challenge title
 - Description
 - Difficulty level
 - Interview category
 - Estimated duration
-

Interview Content

- AI-generated questions or manually written questions.
 - Question order.
 - Number of questions.
 - Time limit per question (optional).
-

Challenge Type

- Public
 - Private
-

Access Settings

Private

- Invitation link
- Invitation code
- Allowed phone numbers
- Opening date
- Closing date
- Maximum attempts

Public

- Entry coin cost
 - Opening date
 - Closing date
 - Maximum participants (optional)
 - Maximum attempts
 - Visibility in the public challenge catalog
-

AI Evaluation

Every completed interview receives an AI-generated evaluation including:

- Overall interview score
- Communication score
- Confidence score
- Technical/content relevance
- Speaking pace
- Clarity
- Filler word analysis
- Personalized coaching recommendations

The evaluation process remains identical for both public and private challenges.

Public Challenge Leaderboard

Public challenges include a live competition board showing metrics such as:

- Overall ranking
- Total score
- Completion time
- Number of participants
- Average challenge score
- Highest score
- Creator information
- Challenge popularity

This encourages repeated participation and long-term engagement.

Creator Dashboard

Every challenge includes a management dashboard where the creator can:

- Monitor participation.
 - View interview recordings (if enabled).
 - Review AI evaluations.
 - Search and filter participants.
 - Export results (future enhancement).
 - Close or archive the challenge.
 - Duplicate an existing challenge.
-

Candidate Experience

Candidates should experience a streamlined interview flow:

1. Open invitation or public challenge.
 2. Review challenge details.
 3. Begin AI interview.
 4. Answer each interview question.
 5. Receive AI evaluation.
 6. View permitted results based on challenge type.
-

Business Rules

- Only authenticated users may create challenges.
- Challenge creation requires an eligible subscription plan.
- Challenge creation consumes coins.
- Public challenges require participants to pay the configured entry fee in coins.
- Private challenges require invitation-based access.
- Private challenges additionally verify that the participant's phone number is included in the creator's approved list.
- Challenge creators always have access to all participant results.
- Public participants can view leaderboards and competition statistics.
- Participants in both challenge types can access only their own detailed AI evaluation.

- Challenges automatically close after the configured end date.
-

Success Metrics

The feature will be considered successful if it increases:

- Daily active users.
- Number of completed interviews.
- User retention.
- Subscription conversions.
- Coin purchases and usage.
- Community engagement through public competitions.
- Recruiter adoption for first-round candidate screening.
- Average number of interviews completed per user.
